PREPARING YOUR BUSINESS TO THRIVE
in an Unpredictable Future

The business world is changing before our eyes.

Technologies long considered science fiction are becoming mainstream. Greater access to knowledge, funding, and digital distribution platforms are reducing time to scale and redefining traditional business models. And perhaps most importantly, notwithstanding enormous and accelerating progress, we still face massive global challenges—like water, food, healthcare, energy—that individuals and organizations must unite to tackle— or ignore at our peril.

It's not enough to simply keep up and try to survive.

Many CEOs are unaware of the forces that will impact them in the future.

Singularity University helps companies stop playing defense and start playing offense.

The pace of change is only getting faster. It's critical to understand breakthroughs happening across multiple industries, as disruption often comes from outside of your traditional competitive set.

Leaders must understand and harness the power of new disruptive business models before they're used against them (think Airbnb vs. Hilton, Uber vs. Yellow Cab, Dollar Shave Club vs. P&G).

Through our cutting-edge curriculum and world-class faculty, Singularity University helps organizations begin to transform into agile and adaptable organizations empowered to leap into the future to drive disruption and achieve exponential results.

Follow the path of incremental improvement and risk disruption. Singularity University helps you make the exponential LEAP.
